AMENDMENT

Sir:

This Amendment is responsive to the Official Action of April 25, 2002. The specification and claims have been amended herein using the replacement paragraphs and rewritten claims format. The present amendment also includes a section entitled "VERSION WITH MARKINGS TO SHOW CHANGES MADE" attached hereto.

In the Specification:

Please replace the paragraph beginning at page 8, line 15, with the following rewritten paragraph:

al

-- FIG. 2 is a block diagram of a second embodiment of a system according to the present invention wherein the server 110 provides terminal emulation session applications 130a-c for a plurality of respective client applications 115a-c. Each application 130a-c identifies the requests received from the respective client application 115a-c. In particular, Identifiers (IDs) are associated with requests made by each client 115a-c. For example, the ID included in a first request from the first client application 115a for updated host screen information identifies the first client application 115a, a second request from the second client application 115b for updated host screen information identifies the second client application 115b, and a third request from the third client application 115c for updated host screen information identifies the third client application 115c. Accordingly, the respective
